If the same sweater number is use by more than one player you must add a 100 to the sweater number for the second player and if a third player used the same number 200 must be added to the sweater number and so on. For e.g. player one is #6, second player to use #6 would be 106 and the third player would 206. Or if multiple sweater are used by one player you can assign him the number 100. The system matches by player name. Look at the last three players on the next screen for an example:
